

User Manual  
**COCKED & FEARLESS**

Thank you for purchasing your new Daredevil pedal. All hand built in Chicago, IL. Your effect is designed to run on a 9V DC power source, negative pin (ground). This pedal is true bypass.

VOLUME - master level of pedal

GAIN - controls amount in distortion circuit

SWEEP - sets EQ position of the cocked wah circuit

BLEND - controls how much wah signal is in the distortion

HI/LOW - selects respective gain settings

BYPASS - effect on/off WAH - engages wah circuit

The Cocked & Fearless is designed having all the features of the Fearless op amp distortion, coupled with the Atomic Cock fixed wah. 2 channels of gain with the footswitch option of blending in a sweepable wah EQ. There is LED indication for each circuit. Cable input for effect is on the right side of the pedal.

For best performance of your effect, use a high quality isolated power source. Any individual wall plug or non-grounded power adaptors may cause unwanted noise.

Warranty info - Inquire with your dealer for their policies on repairs or returns. Daredevil Pedals offers a 2 yr warranty on mechanical parts that are not the result of misuse, modding, or failed repairs by a third party.
