

User Manual
ATOMIC COCK

Thank you for purchasing your new Daredevil pedal. All hand built in Chicago, IL. Your effect is designed to run on a 9V battery or DC power source, negative pin (ground). Unplug your input cable when not in use to prolong the life of your battery. This pedal is true bypass.

GAIN - controls overall output of the boost

BLEND - adjusts the amount of Wah signal that is fed into the boost section

SWEET - sets the sweep of the Wah, Heel is the bass position, Toe is the treble end, just like a regular Wah.

The Atomic Cock offers all the tonal traits of a traditional wah pedal, but with quieter operation and more precise control of the sweep. The wah signal runs into a boost section and can be blended in or out to adjust the intensity.

For best performance of your effect, use a high quality isolated power source. Any individual wall plug or non-grounded power adaptors may cause unwanted noise.

Warranty info - Inquire with your dealer for their policies on repairs or returns. Daredevil Pedals offers a 2 yr warranty on mechanical parts that are not the result of misuse, modding, or failed repairs by a third party. For further questions or details, you can contact us at Daredevilpedals@gmail.com
