## DAISHO - EARL SLICK SIGNATURE

This pedal is a collaboration with artist Earl Slick. Independent Fuzz and Octave circuits are stacked and followed by an optional noise gate for maximum tonal control. Fuzz is articulate and tight, capable of both vintage and aggressive gain styles. The octave up effect is extremely harmonic and sweet, and can also be coupled with other effects on its own for endless sonic possibilities.

**Volume** - controls fuzz output level

**Depth** - either boosts or cuts the low end of fuzz

**Gain** - amount of fuzz gain

**Gate** - turning clockwise increases gate aggression

**Toggle** - down position bypasses gate

Your effect is designed to run on a 9V DC power source, negative pin (ground). This pedal is true bypass.

For best performance of your effect, use a high quality isolated power source. Any individual wall plug or non-grounded power adaptors may cause unwanted noise.

Warranty info - Inquire with your dealer for their policies on repairs or returns. Daredevil Pedals offers a 2 yr warranty on mechanical parts that are not the result of misuse, modding, or failed repairs by a third party.
