

User Manual
LOGAN SQUARE DESTROYER

Thank you for purchasing your new Daredevil pedal. All hand built in Chicago, IL. Your effect is designed to run on a 9V battery or DC power source, negative pin (ground). Unplug your input cable when not in use to prolong the life of your battery. This pedal is true bypass.

LEVEL - controls output volume

GAIN - adjusts the amount of Fuzz

The Logan Square Destroyer is named after the hometown of Daredevil Pedals in Chicago. Nasty and heavy, this is a big silicon fuzz that can also be used for bass guitar. The low end will increase along with the gain control, adding a saturated Fuzz and some bass 'sag' to your tone.

For best performance of your effect, use a high quality isolated power source. Any individual wall plug or non-grounded power adaptors may cause unwanted noise.

Warranty info - Inquire with your dealer for their policies on repairs or returns. Daredevil Pedals offers a 2 yr warranty on mechanical parts that are not the result of misuse, modding, or failed repairs by a third party. For further questions or details, you can contact us at Daredevilpedals@gmail.com
