

User Manual  
**NORTHERN CREEPER**

Thank you for purchasing your new Daredevil pedal. All hand built in Chicago, IL. Your effect is designed to run on a 9V battery or DC power source, negative pin (ground). Unplug your input cable when not in use to prolong the life of your battery. This pedal is true bypass.

LEVEL - controls master output of pedal  
ATTACK- adjusts amount of fuzz gain

The Norther Creeper is a silicon fuzz with a full vintage tone like the classic fuzzes from the 1970's. It has grit and edge to cut through but is also warm and saturated. Use a lower output 9V battery to get the gating and sag effect that certain old pedals sound good with.

For best performance of your effect, use a high quality isolated power source. Any individual wall plug or non-grounded power adaptors may cause unwanted noise.

Warranty info - Inquire with your dealer for their policies on repairs or returns. Daredevil Pedals offers a 2 yr warranty on mechanical parts that are not the result of misuse, modding, or failed repairs by a third party.
