

User Manual
V5 OP AMP FUZZ

Thank you for purchasing your new Daredevil pedal. All hand built in Chicago, IL. Your effect is designed to run on a 9V battery or DC power source, negative pin (ground). Unplug your input cable when not in use to prolong the life of your battery. This pedal is true bypass.

VOLUME - controls master output of pedal

SUSTAIN - controls gain of the fuzz

TOGGLE Switch - bypasses the tone control for a flat

EQ TONE - adjusts the tone when toggle is not in bypass mode

This is a faithful recreation of the classic op amp fuzz from the late 70's including the tone bypass option. A high gain fuzz with the signature midrange EQ that made these legendary. Great for bass guitar as well.

For best performance of your effect, use a high quality isolated power source. Any individual wall plug or non-grounded power adaptors may cause unwanted noise.

Warranty info - Inquire with your dealer for their policies on repairs or returns. Daredevil Pedals offers a 2 yr warranty on mechanical parts that are not the result of misuse, modding, or failed repairs by a third party. For further questions or details, you can contact us at [Daredevilpedals@gmail](mailto:Daredevilpedals@gmail.com)
