

User Manual  
**RED LIGHT DISTRICT**

Thank you for purchasing your new Daredevil pedal. All hand built in Chicago, IL. Your effect is designed to run on a 9V battery or DC power source, negative pin (ground). Unplug your input cable when not in use to prolong the life of your battery. This pedal is true bypass.

**VOLUME** - controls master output of pedal

**GAIN** - controls distortion gain

**TOGGLE** Switch - selects normal or scooped mid setting **SCOOP** - adjusts the width of the scoop or the 'Q'. The midrange scoop is adjustable from a narrow eq range to a wider one using the control knob.

**FOOTSWITCHES** - Bypass turns effect on/off. The other, HI/LO, selects either of the 2 gain channels. The RLD has a similar gain circuit to the Fearless but with the added tone stack.

For best performance of your effect, use a high quality isolated power source. Any individual wall plug or non-grounded power adaptors may cause unwanted noise.

**Warranty info** - Inquire with your dealer for their policies on repairs or returns. Daredevil Pedals offers a 2 yr warranty on mechanical parts that are not the result of misuse, modding, or failed repairs by a third party. For further questions or details, you can contact us at [Daredevilpedals@gmail.com](mailto:Daredevilpedals@gmail.com)
