

User Manual  
**WOLF DELUXE**

Thank you for purchasing your new Daredevil pedal. All hand built in Chicago, IL. Your effect is designed to run on a 9V battery or DC power source, negative pin (ground). Unplug your input cable when not in use to prolong the life of your battery. This pedal is true bypass.

VOLUME - controls output of effect  
GAIN - controls level of Fuzz

The Wolf Deluxe is a silicon transistor 60's style fuzz with high sustain, and a signature 'boxy' mid-range EQ. The gain will adjust from super saturated fuzz down to warm overdriven tones. This pedal uses NOS transistors, all individually tested for consistent tone between units. Sounds great with a lower output 9V battery too.

For best performance of your effect, use a high quality isolated power source. Any individual wall plug or non-grounded power adaptors may cause unwanted noise.

Warranty info - Inquire with your dealer for their policies on repairs or returns. Daredevil Pedals offers a 2 yr warranty on mechanical parts that are not the result of misuse, modding, or failed repairs by a third party. For further questions or details, you can contact us at [Daredevilpedals@gmail](mailto:Daredevilpedals@gmail)
