

# COLOUR BOX

JHS  
500

*The Colour Box is a versatile, powerful and unique 500 unit that covers all the bases. Preamp, seven control EQ, high pass and the ability to give you prestige cleans or completely mangled tones.*

## Controls

### GAIN SECTION

**MASTER** - Controls the overall output volume of the unit.

**PRE VOL** - Controls the amount of signal hitting the second gain stage, giving you access to overdrive, distortion, or fuzz.

**STEP** - Increases the gain of the two preamps in five clickable stages.

### HPF SECTION

**HI PASS** - This control allows you to only let high frequencies pass. Turning clockwise decreases low frequencies.

**HI PASS TOGGLE** - Engages the Hi Pass function when switched down.

### EQ SECTION

**AIR** - Adjust the amount of high end boost.

**TREBLE** - Cuts or boosts high frequencies.

**MID** - Cuts or boosts mid frequencies.

**MID SHIFT** - Shifts the mid center frequency.

### PARAMETRIC BASS EQ SECTION

**BASS** - Cuts or boosts bass frequencies.

**BASS SHIFT** - Shifts the bass center frequency.

**BASS Q** - Adjusts the bandwidth around the bass center frequency.

### TOGGLES

**PAD** - Toggle up engages a -20dB pad.

**LINE/MIC** - Toggle up is line level, toggle down is mic level.

**LO-Z/HI-Z** - Changes input impedance.

**POLARITY** - Toggle down is standard input polarity, toggle up is reverse polarity.

**+48V** - Toggle up engages phantom power.
