

# SPRING TANK

JHS PEDALS

*Classic spring-like reverb in a simple package with enough options to satisfy any spring reverb enthusiast. Blow them away with the Spring Tank!*

## Controls

**BOOST** - Controls the amount of volume boost when the pedal is turned on.

**HIGHS** - Functions as a high pass filter. Turning right is brighter, left is darker.

**DEPTH** - Controls the size or space of the reverb. Left is smaller, right is bigger.

**LENGTH** - Controls the decay time of the reverb. Left is shorter, right is longer.

**TANK 1** - Controls the main reverb mix. Left is less, right is more.

**TANK 2** - Controls the reverb mix when the Tank 2 switch is engaged.

## SWITCHES

**BYPASS** - Turns the pedal on or off.

**TANK 2** - Engages the Tank 2 reverb mix knob which acts as a secondary reverb mix you can use on the fly.

## Jacks

**INPUT** - Lower jack on the right side of the pedal.

**EFFECTS LOOP** - Upper jack on the right side of the pedal. Insert a TRS splitter cable into this jack and plug it in to any pedal to add the effect to the wet reverb effect only.

**OUTPUT** - Jack on the left side of the pedal.

**POWER** - Uses 9V DC Negative Center. Do not use more than 9V DC. Your warranty will be voided. 73mA consumption.
