

## TWIN TWELVE V2

**JHS** PEDALS

*For the first time ever, the legendary tones of the Silvertone 1484 amplifier are at your feet. Rich preamp/overdrive tones with a unique voice and character not found in any other pedal on the market.*

### Controls

**VOLUME** - Controls the output volume.

**DRIVE** - Controls the amount of drive or gain just like a tube amp being cranked at high volumes.

**BASS** - This is an active bass control just like the one you would find on the classic amp, modified for a more usable sweep. Left is less, right is more

**TREBLE** - Active treble control just like the amp. Left is less, right is more.

**CLEAN/DIRT TOGGLE** - Switches between clean preamp boost and overdrive mode. The LED is blue when in Clean mode and is red to indicate you are in the Dirt mode.

### Jacks

**RED REMOTE JACK** - The upper jack on the right side of the pedal is for a JHS "Red Remote" switch. Using this switch you can toggle between the Clean mode and the Dirt mode on the fly.

**INPUT** - Lower jack on the right side of the pedal.

**OUTPUT** - Jack on the left side of the pedal.

**POWER** - Uses 9V DC Negative Center. The Twin Twelve is internally charged to 18V. Do not use more than 9V DC. Your warranty will be voided. 100mA max consumption.
