Installation Manual for
RockBoard® The Tray
Universal Power Supply Mounting Solution
English

Thank you for choosing The Tray by **RockBoard®**!

The **RockBoard®** The Tray is a universal power supply mounting solution for almost every multi-power supply. Thanks to the practical one-size-fits-all design, The Tray can be mounted under all new **RockBoard®** pedalboards (except DUO 2.0, 2.1, 2.2, 2.3, TRES 3.0 & CINQUE 5.3 MAX). No drilling is required to attach The Tray and it can be attached to the board with just a single rivet.

Mounting

Step 1

Take the **RockBoard®** The Tray and mount your power supply on it. We recommend the use of hook & loop tape or cable ties.

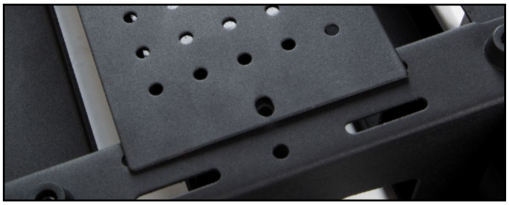

Step 2

Place the lugs of the **RockBoard®** The Tray into the designated cutouts in the support braces of your **RockBoard®**.

Step 3

Place the **RockBoard®** The Tray so that the mounting holes of the **RockBoard®** The Tray and the **RockBoard®** pedalboard overlap.

Step 4

Take one of the included plastic rivets and separate the upper and the lower parts.

Step 5

Push the lower part of the rivet into the lined up mounting holes. For optimal fixation the bottom part must be placed flat to the surface of the **RockBoard®** The Tray.

Step 6

Push in the upper part of the rivet until latches into the bottom part. The Tray is now completely mounted. To remove The Tray, loosen the rivet by sliding a flat blade screwdriver into the recess on the side and carefully lift off the upper part of the plastic rivet.

Note: The manufacturer reserves the right to change these specifications without notice.
