Blue Crystal

User's Manual

INSTRUCTIONS AND SPECIFICATIONS

Input Impedence:	1M
Output Impedence:	10K
Current Draw:	8mA(both engine on)
Power supply:	DC 9V adaptor
Dimensions:	12.5(L)*6.5(W)*5.4(H) cm
N. W.:	0.49 kg
True bypass	

DESCRIPTIONS

Blue Crystal is a low-gain, transparent overdrive pedal that delivers a remarkably smooth and comfortable listening experience like its name.

It preserves the original tone's dynamics and frequency balance to the greatest extent possible, while introducing minimal coloration. Offering extensive adjustability and a wide range of tonal possibilities, it remains simple to operate—just a few knobs allow you to easily dial in your ideal or preferred sound, effortlessly achieving anything from subtle, slightly gritty overdrive to richly midrange-heavy tones.

This classic overdrive delivers the warm, vintage tube tone reminiscent of Dumble, while maintaining excellent clarity and transparency. Highly recommended for those who appreciate this type of sound.

Try this stunning overdrive to shape more details of your guitar tone.

ABOUT LEGEND SERIES

LEGEND series is our brand-new handcrafted line started in 2026.

Since my first handmade pedal in 2006, I designed all the pedals and made all by hand for over 3 years for those friends who trusted me. and this experience made me easily start my carrier as a pedal designer for the first company I worked for before my own brand establishment.

Now, it is so exciting to bring hand-made series back to all users who love higher level quality pedals with superior tones, or to friends who love collecting boutique pedals.

This product series will utilize many high-grade DIP components, including military-spec metal film resistors, WIMA audiophile capacitors, and various operational amplifiers carefully selected through rigorous screening. It also features high-quality diodes, transistors, and high-spec gold-plated circuit boards that we have consistently used over the years- further enhancing both product quality and sound performance.

This series will bring superior sound texture! I hope this handcrafted series will inspire your music.
