

WREN AND CUFF FADE FONT '94™

Thanks for your purchase!

You've brought home a pedal that embodies the perfect blend of vintage authenticity and modern precision. The Fade Font '94 isn't just a reissue—it's a faithful recreation of one of Matt's favorite 1994 Sovtek™ Big Muffs™. Rather than a schematic clone, it's a meticulous replication, built from a piece-by-piece deconstruction of the original pedal to capture the gritty character and rich tonal magic that made these units iconic.

With custom 150K pots and a carefully tuned high-gain circuit, this pedal delivers the papery grit and commanding low end that made the original a favorite among guitarists and bassists alike.

Whether you're exploring new tones or diving into the sounds that shaped music history, the Fade Font '94 delivers a bold, unmistakable voice. It's not just a pedal; it's a connection to the rich legacy of the Sovtek BM lineage.

Housed in a rugged, full-sized enclosure that mirrors the dimensions of the vintage unit—including the original PCB size and layout—it offers a faithful recreation of a historic piece with modern upgrades and bulletproof construction you can rely on for years to come.

ADDITIONAL INFO
