

MAIN FEATURES

Congratulation on the purchasing of the W1 Wave Phaser! The Xvive Wave Phaser is a state-of-the-art phaser effect for guitar, bass, and other musical instruments with an electrical signal output.

- 1) Total (true) bypass with an LED effect-on indicator.
- 2) Intelligent envelope detector circuitry allows accurate and rapid staccato playing when strings muted between notes
- 3) Envelope and LFO sweep control for a wide range of effects
- 4) Companding noise reduction for quiet operation.

Engineered for Musicians

WAVE PHASER

SPECIFICATIONS

Housing Dimensions	4-3/4"x2-3/4"x1-9/32"
Weight	0.35kg
Housing Material	Aluminum
Bypass	True-Hard-Wire
Current Draw	50mA
Power supply	18 volts DC
Input	1/4" monaural jack (impedance: 10K ohms)
Output	1/4" monaural jack (impedance: 1K ohms)

POWER

The Xvive Wave Phaser is powered by 18-volt adapter such as Xvive 18v-200mA adapter. If the polarity is incorrect the pedal will not operate, but will not be damaged.

CONTROLS

- 1) **ENVELOPE SENSITIVITY** is set for the desired envelope control of the effect.
- 2) **SWEEP** is set for only envelope controlled sweep at one end of the control, only LFO control on the other end, or any combination of the two for settings between the extremes.
- 3) **LFO SPEED** controls the rate of LFO sweep.
- 4) **FEEDBACK (resonance)** controls the depth of the effect.
- 5) **OUTPUT LEVEL** can be set so the effect is louder than, the same volume as, or softer than the bypass signal when the bypass footswitch is operated.
- 6) **UP/DOWN** toggle switch controls the direction of the envelope controlled sweep
